

PB Assist® +

Probiotic Defense Formula

Supports healthy digestive functions and immunities*

PRODUCT DESCRIPTION

PB Assist+ is a proprietary formula of pre-biotic fiber and six strains of probiotic microorganisms in a unique double-layer vegetable capsule. It delivers 6 billion CFUs of active probiotic cultures and soluble pre-biotic FOS (fructo-oligosaccharides) that encourage friendly bacterial growth.* The time-release, double-capsule delivery system is designed to help protect the sensitive probiotic cultures from stomach acid. PB Assist+ offers a unique, safe, and effective way to deliver the well-recognized digestive and immune system support benefits of probiotics.*

PRIMARY BENEFITS

- Promotes a positive balance and proliferation of beneficial bacteria*
- Maintains healthy intestinal microflora balance*
- Supports healthy functioning of the digestive and immune systems*
- Supports the health of the GI tract, particularly the intestines and colon*
- Helps support optimal metabolism and absorption of food*

DIRECTIONS FOR USE

Take one double-layer capsule three times daily with food for 10 days each month to promote colonization of friendly digestive flora.* Can be used more frequently and for extended periods of time when digestive flora has been compromised by digestive stressors. PB Assist+ also may be used when traveling to boost digestive immunities, or once a day as an ongoing maintenance program for people with occasional digestive discomfort.*

CAUTIONS

Some people may experience an initial change to digestive schedule and function when they begin using pre-biotic FOS and probiotics. For most people, these symptoms are mild and should disappear after a few days. Pregnant or nursing women and people with known medical conditions should consult a physician before using. Do not use if bottle is opened or capsules are broken.

Note: Although the PB Assist+ double-layer encapsulation technology makes it unnecessary to refrigerate, it is suggested that unopened bottles of PB Assist+ be stored in a cool, dry place and opened bottles be refrigerated when possible.
